- \* Bucket Mounts

Reach: (Example)  
Standard Wheel Loader 13' + boom 10' + head 2-1/2' = 25'  
Your Wheel Loader Spec. \_\_\_ + boom \_\_\_ + head 2' = \_\_\_

**Tomorrow's Silage Facer is here today.** Field experience has required Nortec to continuously improve and upgrade the silage facer line. Today's large capacity bunkers may require wheel loaders to reach the top of the bunkers. Silage is now more tightly packed and requires equipment with high torque to process the feed. The Ultra silage facer is an industrial piece of equipment to match the industrial standards of material handling equipment now found on many farms.

**The most amazing aspect of the NORTEC PowerTEC motor is its huge torque potential from its relatively small size. The PowerTEC motor is capable of producing output torque never seen in the industry.**
